Covid-19 Guidance for Parents/carers

Your child has one of the three main coronavirus symptoms:

- A high temperature
- A new, continuous cough
- A loss or change to sense of smell or taste

Your child tested positive on a lateral flow test even if not showing symptoms.

Book a PCR test (this must taken be within 2 days)

Your child must self-isolate whilst you wait for the result.

Siblings in the household do not need to self-isolate and should continue attending school (unless they start to show symptoms/test positive)

If the PCR test is negative & your child is well, they can return to school.

If the PCR test is positive, your child must continue to self-isolate for 10 days from when their symptoms started or from their positive test result.

Other members of the household DO NOT need to self-isolate unless they are told to by NHS Test and Trace, start to show symptoms or test positive. Any siblings should continue attending school.

If your child has been in close contact with somebody who has tested positive, you will now be contacted by NHS Test and Trace, *not* the school.

NHS Test & Trace have informed you that your child has been identified as a close contact.

Book a PCR test

If they are well, your child should continue to attend school whilst you wait for the result.

If the PCR test is

negative, they should continue attending school as normal.

positive, they must selfisolate for 10 days.

If your child is self-isolating, but feeling well, they will be provided with remote learning from school via MS Teams or a paper pack. Please support your child to ensure they complete this learning.
